

Title: Instalar Phoenix OS en nexus 9 Date: 2016-1-19 23:34 Modified: 2016-1-19 23:34 Category: Android Tags: phoenixos, nexus9, phoenix, adb Authors: procamora Slug: instalar-phoenix-os Summary: Status: published

#Requisitos: Tener instalados los drivers del dispositivo

#Pasos:

adb reboot bootloader

A la hora de instalar Phoenix OS 1.0 en la nexus 9 LTE he tenido este problema al ejecutar el script de instalación  
./flash-all.sh

sending 'system' (678746 KB)...

FAILED (remote: data length is too large)

finished. total time: 3.146s

ere are the steps i took to manually flash: run the flash-all.bat up until the point where it fails

`unzip` Nexus9\_flounder\_jenkins\_stable\_11\_2016-01-04\_20-25.zip

`fastboot flash system system.img`

`fastboot flash recovery recovery.img`

`fastboot flash cache cache.img`

`fastboot flash boot boot.img`

`fastboot flash userdata vendor.img` # - looks like userdata should be vendor? - mine worked with userdata rega

from tablet - select hboot

`select` factory reset

IMPORTANTE INSTALAR LA PLAY STORE, ESTA LA APK PARA BAJÁRSELA EN DESCARGAS <https://www.reddit.com/r/>

instalar gaps. lo anterior no me funciona
